

## ROASTED COFFEE:

The coffee roasting is the process that most influence the final result of the cup of coffee that you drink. The roasted coffee that we offer can be:

**Light roast**, it keeps well the coffee flavours it has in origin and that the toaster does not want to be lost. It is used to protect herbal and fruit nuances.

**Medium roast** preserves the coffee's caffeine, provides greater sweetness, and as the sugars begin to caramelize nuances of nuts, caramel and chocolate are achieved.

**Dark roast** dries the coffee much more and all its essential oils are extracted in a process known as dry distillation.

Our Offerings:      Roasted Beans and ground (roasted at origin)

Packed as per requirement

Certified by TBS and TCB
